SECTION II – LETTER OF OFFER SUMMARY

Summary of Industry

India's market cap-to-GDP ratio witnessed a rise from 54% in 2008 to 76% in 2019, compared to 93% for the overall global equity market (source: World Bank). This shows a scope for further expansion of the India's market cap, driven by both GDP growth as well as an increase in the market cap-to-GDP ratio. With GDP growth expected to gradually pick up, increasing formalisation of economy and more entities from newer segments getting listed (insurance companies, ecommerce service providers), India's market capitalisation to GDP ratio is likely to increase further in next few fiscals. As the covid vaccination drive picks up pace across the globe, the world economy is set to return to the growth path (+5.5% in CY21E) with India expected to lead the growth revival with a double-digit expansion of 11.5% in FY22. Improvement in global macroeconomic factors and monetary/fiscal stimulus by central banks/governments will continue to supply liquidity in global equity markets and support economic recovery over the next couple of years.

For further details, please refer to the chapter titled "Industry Overview" at page 47.

The risks described below are not the only ones relevant to the country, the industry in which our Company operates in India, our Company or our Equity Shares. Additional risks and uncertainties not presently known to us or that we currently believe to be immaterial may also have a material adverse effect on our business, results of operations and financial condition. If any of the following risks, or other risks that are not currently known or are deemed immaterial, actually occur, our business, results of operations and financial condition could suffer, the trading price of our Equity Shares could decline and you may lose all or part of your investment. Prospective investors should consult their tax, financial and legal advisors about the particular consequences of an investment in this Issue.

This Letter of Offer also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including considerations described below and in “Forward Looking Statements” on page 16. To obtain a better understanding of our business, you should read this section in conjunction with the section titled “Financial Statements” beginning on page 69, together with all other financial information contained in this Letter of Offer.

INTERNAL RISK FACTORS

BUSINESS RELATED RISKS

- 1. The continuing effect of the COVID-19 pandemic on our business and operations is highly uncertain and cannot be predicted.***

In the first half of 2020, COVID-19 spread to a majority of countries across the world, including India. The COVID-19 pandemic has had, and may continue to have, repercussions across local, national and global economies and financial markets. In particular, a number of governments and organizations have revised GDP growth forecasts for 2021 downward in response to the economic slowdown caused by the spread of COVID-19, and it is possible that the COVID-19 pandemic will cause a prolonged global economic crisis or recession.

In the event a member or members of our senior management team contract COVID-19, it may potentially affect our operations. Further, in the event any of our employees’ contract COVID-19, we may be required to quarantine our employees and shut down our office. Risks arising on account of COVID-19 can also threaten the safe operation of our office, loss of life, injuries and impact the well-being of our employees. These risks could have an adverse effect on our business, results of operations, cash flows and financial condition. At this point of time, our Company cannot predict by when the economy will resume to normalcy, or at all.

- 2. There are outstanding litigations involving our Promoter which, if determined against the Promoter, may adversely affect our business, reputation and financial condition.***

This Rights Issue is subject to the outcome of an outstanding appeal with Hon’ble Securities Appellate Tribunal for which our company has given an undertaking vide its letter dated 30th August 2021 addressed to BSE Ltd to not go ahead with this Rights Issue if the ‘stay’ on one of it’s Promoters is revoked by the Hon’ble Securities Appellate Tribunal.

Case Details :- SEBI vide order no. WTM/AB/IVD/ID2/7988/2020-21 dated 23 June 2020, in the matter of Pyramid Saimira Theater Limited, debarred Mr. Yatin B. Shah, Promoter of our Company, inter-alia, from dealing in securities and accessing the capital market for a period of 2 years. However, the Hon’ble Securities Appellate Tribunal has on appeal filed by Mr. Yatin Shah (Appeal No. 227 of 2020) ‘stayed’ the order till the next date of hearing. The next date of hearing in the said matter is 12 November 2021 as mentioned in the SAT order dated 28

October 2021. Therefore, as on date of this Letter of Offer the stay continues to be in force pending final disposition of the appeal by SAT.

In the same matter, SEBI also imposed a penalty of Rs. 2,00,000 vide Adjudication Order bearing reference no. Order/VV/AA/2021-22/12081 dated 31st May 2021 on our Promoter Mr. Yatin B. Shah. Our Promoter has paid the requisite penalty on 02nd June 2021 vide an Axis Bank cheque no. 208407.

We cannot assure you that this legal proceeding will be decided in favour of our Promoter, or that no further liability will arise out of this proceeding. We may incur reputational loss, business loss or our share price may get adversely affected if the results of this proceeding are adverse.

3. *Our primary revenue stream is from share trading activities. With the volatility of stock markets, we may face challenges in achieving a high growth rate for the business.*

Indian stock markets have been rallying from more than a year now and we cannot ascertain how long the rally is going to sustain or when the volatility will reduce to normalcy. The volatility in the stock markets can cause huge upside or downside in the revenue we earn from share trading activities. However, with the stimulus policies of the Indian government we feel that the volatility will reduce soon and the stock market will again be on a steady phase.

4. *The top-level management of the company is associated with the company from less than 2 years.*

In the year 2019, our company was acquired by its current promoters – Mr. Yatin Bhupendra Shah (“Acquirer”) along with HKG Money Tech Private Limited (formerly called IG Financial Services Pvt Ltd) (“Person Acting in Control”) from its former promoters – Mr. Rajeev Gupta and Yogya Infrastructure Ltd pursuant to a Share Purchase Agreement dated July 17, 2019 and an Open Offer from August 30, 2019 to September 16, 2019 (both dates inclusive). Consequently, the management of the company has been changed to its current form. Further, our Chief Financial Officer is associated with our company from less than a year. For more details on the top management, Key Management Personnel and their appointment, please refer to chapter “Our Management” beginning on page 58.

5. *We have recently started foraying into the e-commerce market of India.*

We have recently received the marketing rights for 3 web portals and have been developing 2 more web portals to work in the e-commerce industry. Venturing into a new area could pose multiple risks such as operational risk, technology risk, financial risk, competitive risk and market risk. However, while decentralising and enabling competitive personnel in pure focus areas we have assigned different persons who would advice or handle the different areas in this business. Also refer to the section titled “Our Business” and “Our Management” beginning on page 55 and 58 respectively.

6. *Our business strategies and expansion plans may be subject to various unfamiliar risks and may not be successful.*

Our business strategies include widening our customer base by entering into new geographies and strengthening our relationships with our existing clients. These strategies may require us to expand our operations to other geographical areas and in new industry verticals. Risks that we may face in implementing our business strategy in these markets may substantially differ from those previously experienced, thereby exposing us to risks related to new markets, industry verticals and clients. The commencement of operations beyond our current markets and industry verticals is subject to various risks including unfamiliarity with pricing dynamics, competition, service and operational issues as well as our ability to retain key management and employees. There can also be no assurance that we will not experience issues such as capital constraints, difficulties in expanding our existing operations and challenges in training an increasing number of personnel to manage and operate our expanded business, or that we will be able to successfully manage the impact of our growth on our operational and managerial resources and control.

7. *Our Company has experienced negative cash flow in the past and may continue to do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.*

Our Company has experienced negative net cash flow in operating, investing and financing activities in the past. Following are the details of our cash flow position during the last three financial years based on restated financial statements are;

(₹ in lakhs)

Particulars	Period ending June 30, 2021	March 31, 2021	March 31, 2020	March 31, 2019
Net cash flow from / (used in) operating activities (A)	(7.27)	32.63	(80.38)	(251.50)
Net cash flow from / (used in) investing activities (B)	0.00	(20.32)	63.85	268.10
Net cash flow from / (used in) financing activities (C)	(0.09)	(0.01)	(0.12)	(0.87)

We may incur negative cash flows in the future which may have a material adverse effect on our business, prospects, results of operations and financial condition. For further details please refer to “Restated Financial Information” beginning on page 69.

8. ***Our success depends largely upon the services of our Promoters, Board, Management and other Key Managerial Personnel and our ability to retain them. Our inability to attract and retain key personnel may adversely affect the operations of our Company.***

Our Company, Promoters, Board of Directors and the Key Managerial Personnel have built relations with clients and other persons who are connected with our business. Further, our key personal also possesses the requisite domain knowledge to provide efficient services to our clients. Accordingly, our Company’s performance is dependent upon the services of these key personnel. Our future performance will, therefore, depend upon the continued services of these persons. Demand for key personnel in the industry is intense and our inability to attract and retain them may affect the operations of our Company.

9. ***If we fail to innovate, adapt and respond effectively to rapidly changing technology, our solutions may become less competitive or obsolete.***

Our continued success will depend on our ability to continuously enhance and improve our solutions to meet customers’ needs. If we are unable to enhance our solutions to meet market demand in a timely manner, we may not be able to maintain our existing customers or attract new customers, which would have a material adverse effect on our business, results of operations, cash flows and financial condition. In addition, shifts in customer demand may render existing technologies obsolete, requiring additional capital expenditures and/or writedowns of assets.

10. ***Ecommerce is highly fragmented and competitive industry and increased competition may lead to multiple challenges to our revenues, profit margins and market share.***

Ecommerce industry in which we are foraying is a highly competitive industry, dominated by a large number of organized and unorganized layers. Increased competition from other organized and unorganized third-party service providers may lead to multiple challenges to our revenues, profit margins and market share.

Our success depends on our ability to anticipate, understand and address the preferences of the prospective clients as well as to understand evolving industry trends and our failure to adequately do so could adversely affect our business.

In ecommerce we are a new entrant, we may or may not be able to compete effectively with our competitors, some of whom may have more experience. Other factors that could affect our ability to maintain our levels of revenues and profitability include the development of an operational model similar or superior to ours by a competitor. Our inability to compete effectively could affect our ability to retain our existing clients or attract new clients which may in turn materially and adversely affect our business, financial condition, results of operations, cash flows and prospects.

11. ***We have not commissioned an industry report for the disclosures made in the chapter titled “Industry Overview” and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us.***

We have neither commissioned an industry report, nor sought consent from the quoted website source for the disclosures which need to be made in the chapter titled “*Industry Overview*”. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have not been obtained. We have not independently verified such data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Letter of Offer. Further, the industry data mentioned or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Letter of Offer in this context.

12. Our Promoters or members of our Promoter Group may pledge or dispose of the Equity Shares held by them which may adversely impact the trading price of our Equity Shares.

There is no restriction on our Promoters and members of the Promoter Group to dispose, transfer or pledge their Equity Shares, and our Promoters and / or members forming part of the Promoter Group may at any time pledge or dispose of the Equity Shares held by them including immediately after listing of Rights Equity Shares pursuant to this Rights Issue to the extent applicable. In the event of creation of such a pledge, the pledgee may exercise the right of acquiring, selling or otherwise disposing of such Equity Shares if the pledgor fails to abide by the terms and conditions of the pledge so created. Any transfer / sale of Equity Shares by our Promoter and / or members forming part of the Promoter Group will lead to a dilution of the Promoter holding in our Company which may adversely impact the trading price of our Equity Shares.

13. We have not paid dividends in the past and our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.

We have not paid dividends in the past. Our revenues are dependent on various factors such as future earnings, financial condition, cash flows, working capital requirements and capital expenditures. The combination of these factors may result in significant variations in our revenues and profits and thereby may impact our ability to pay dividends.

14. Our Company has not yet applied for the registration of any logo or any of the intellectual property, that it uses or may use, with the registrar of Trademarks.

Our Company has not yet applied for the registration of the logo i.e. or any of the intellectual property that it uses or may use in future. Any failure to get the same registered in our name may cause any third-party claim and may lead to litigation and our business operations could be affected. Even if our trademarks are registered, we may not be able to detect any unauthorized use or infringement or take appropriate and timely steps to enforce or protect our intellectual property, nor can we provide any assurance that any unauthorized use or infringement will not cause damage to our business prospects.

15. We have not taken any insurance. Therefore, it may not be adequate for us to protect us against all potential losses to which we may be subject to, and this may have a material adverse effect on our business and financial condition.

We do not maintain any kind of insurance in the company. Therefore, any liability that could have been covered by an insurance policy could result in additional costs, which would reduce our profits. Further, we may be subject to claims arising from alleged, suspected or actual defects in the services we render. In the event that any significant liability, performance improvement or claims are brought against us, which are not covered by an insurance, it may adversely affect our business, financial condition, results of operations and prospects.

RISKS RELATING TO RIGHTS ISSUE

16. Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of Investor's shareholding

The Rights Entitlements that are not exercised prior to the end of the Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted pursuant to increase in paid up share capital. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Rights Issue. Renounees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the Demat Account of the Renounees prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renounee will not be able to apply in this Rights Issue with respect to such Rights Entitlements.

17. Our Company may not be able to raise the entire ₹ 1400 lakhs as proposed through the present Rights Issue due to non-subscription by shareholders of their rights entitlement either in partial or full.

While the promoters of our company have conveyed their intention to subscribe to the present rights issue to the full extent of their entitlement and that they shall not renounce their Rights Entitlements (except to the extent of renunciation by any of them in favour of any other Promoter or member of the Promoter Group) subject to the aggregate shareholding of our Promoters and Promoter Group being compliant with the minimum public shareholding requirements under the SCRR and the SEBI Listing Regulations, receipt of balance funds from the non-promoter shareholders would depend upon their interest in the issue and receipt of their subscription in the rights issue. In the event of non-participation of some or all of the non-promoter shareholders of our company, we may not be able to raise the targeted amount of ₹ 1400 lakhs through the present rights issue and the objects of the Issue may have to be met from other financing arrangements and / or adjustment in schedule of implementation.

18. The B-WAP payment mechanism facility proposed to be used for this Issue may be exposed to risks, including risks associated with payment gateways.

In accordance with SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/78 dated May 6, 2020, a separate web based application platform, i.e., the B-WAP facility (accessible at www.bigshareonline.com), has been instituted for making an Application in this Issue by resident Investors. Further, B-WAP is only an additional option and not a replacement of the ASBA process. On B-WAP, the resident Investors can access and fill the Application Form in electronic mode and make online payment using the internet banking or UPI facility from their own bank account thereat. For details, see para "Making of an Application through the Registrar's Web-based Application Platform ("B-WAP") process" in the Section titled Terms of the Issue beginning on page 108. Such payment gateways and mechanisms are faced with risks such as:

- keeping information technology systems aligned and up to date with the rapidly evolving technology in the payment services industries;
- scaling up technology infrastructure to meet requirements of growing volumes;
- applying risk management policy effectively to such payment mechanisms;
- keeping users' data safe and free from security breaches; and
- effectively managing payment solutions logistics and technology infrastructure.

Further, B-WAP is a new facility which has been instituted due to challenges arising out of COVID-19 pandemic.

We cannot assure you that B-WAP facility will not suffer from any unanticipated system failure or breakdown or delay, including failure on part of the payment gateway, and therefore, your Application may not be completed or rejected. These risks are indicative and any failure to manage them effectively can impair the efficacy and functioning of the payment mechanism for this Issue. Since Application process through B-WAP is different from the ASBA process, there can be no assurance that investors will not find difficulties in accessing and using the BWAP facility.

19. There is no guarantee that the Rights Equity Shares issued pursuant to this Rights Issue will be listed on the Stock Exchange in a timely manner.

In accordance with Indian law and regulations and the requirements of the Stock Exchange, in principle and final approvals for listing and trading of the Rights Equity Shares issued pursuant to this Rights Issue will not be applied for or granted until after the Rights Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorising the issuing of Rights Equity Shares to be submitted. Accordingly, there could be a failure or delay in listing the Rights Equity Shares on the Stock Exchange. If there is a delay in obtaining such approvals, we may not be able to credit the Rights Equity Shares allotted to the Investors to their depository participant accounts or assure ownership of such Rights Equity Shares by the Investors in any manner promptly after the Closing Date. In any such event, the ownership of the Investors over Rights Equity Shares allotted to them and their ability to dispose of any such Equity Shares may be restricted.

EXTERNAL RISK FACTORS

- 20. We may, at any time in the future, make further issuances or sales of our Equity Shares, and this may significantly dilute your future shareholding and affect the trading price of our Equity Shares.**

Any future equity issuances by us, may lead to the dilution of Investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of our Equity Shares, which may lead to other adverse consequences for us including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. In addition, any perception that such issuance or sales of shares may occur, may lead to dilution of your shareholding, significantly affect the trading price of our Equity Shares and our ability to raise capital through an issue of our securities. There can be no assurance that such future issuance by us will be at a price equal to or more than the Issue Price. Further, there can be no assurance that we will not issue further shares or that the major shareholders will not dispose of, pledge or otherwise encumber their shares.

- 21. Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations and prospects.**

The regulatory and policy environment in which we operate is evolving and subject to change. While some changes such as streamlining of regulatory mechanism and reduction in the rates of direct taxes has benefitted the Company, certain other changes, including the instances mentioned below, may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

- 22. Regional and communal conflicts, terrorist attacks, civil disturbances, wars, natural disasters, fuel shortages, epidemics and labour strikes in India may have a material adverse effect on our Company's business and on the market for securities in India.**

Increased political instability, evidenced by the threat or occurrence of terrorist attacks, enhanced national security measures, conflicts in several regions in which we operate, strained relations arising from these conflicts and the related decline in customer confidence may hinder our ability to do business. Further, our operations are dependent on our ability to protect our facilities and infrastructure from fire, explosions, floods, typhoons, earthquakes, power failures and other similar events. India has experienced natural disasters such as earthquakes, a tsunami, floods and droughts in the past few years.

INDUSTRY OVERVIEW

Overview of the Global Economy

After a 3.3% estimated contraction in 2020, the global economy is projected to grow 6% in 2021, softening to 4.4% in 2022. The 2020 contraction is 1.1% points less than projected at the October 2020 World Economic Outlook (WEO), reflecting the more-than-expected growth in the second half of the year for most regions after lockdowns were eased and as economies adapted to new ways of working. The 2021 and 2022 projections are respectively 0.8 and 0.2 of a percentage point stronger than at the October 2020 WEO, reflecting additional fiscal support in a few large economies and the anticipated vaccine-powered recovery in the second half of the year. Global growth is expected to ease in the medium term—reflecting projected damage to supply potential and forces that predate the pandemic, including aging-related slower labour-force growth in advanced economies and some emerging-market economies. Thanks to an unprecedented policy response, the COVID-19 recession is likely to leave smaller scars than the 2008 global financial crisis. However, emerging-market economies and low-income developing countries have been hit harder and are expected to suffer more significant medium-term losses. (Source: World Economic Outlook, April 2021, IMF)

A year and a half since the onset of the COVID-19 pandemic, the global economy is poised to stage its most robust post-recession recovery in 80 years in 2021. But the rebound is expected to be uneven across countries, as major economies appear set to register strong growth even as many developing economies lag. Global growth is expected to accelerate to 5.6% this year, largely on the strength in major economies such as the United States and China. And while growth in 2021 for almost every region of the world has been raised, many continue to grapple with COVID-19 and what is likely to be its long shadow. Despite this year's pickup, the level of global GDP in 2021 is expected to be 3.2% below pre-pandemic projections, and per-capita GDP among many emerging market and developing economies is anticipated to remain below pre-COVID-19 peaks for a prolonged period. As the pandemic continues to flare, it will shape the path of global economic activity.

The United States and China are each expected to contribute about one quarter of global growth in 2021. The U.S. economy has been bolstered by massive fiscal support, vaccination is expected to become widespread by mid-2021, and growth is expected to hit 6.8% this year, the fastest since 1984. China's economy – which did not contract last year – is expected to grow a solid 8.5% and moderate as the country's focus shifts to reducing financial stability risks.

Growth among emerging-market and developing economies is expected to accelerate to 6% this year, helped by increased external demand and higher commodity prices. However, the recovery of many countries has been constrained by resurgences of COVID-19, uneven vaccination and a partial withdrawal of government economic-support measures. Excluding China, growth is anticipated to unfold at a more modest 4.4%. In the longer term, the outlook for emerging-market and developing economies will likely be dampened by the lasting legacies of the pandemic – erosion of skills from lost work and schooling, a sharp drop in investment, higher debt burdens and greater financial vulnerabilities. Growth among this group of economies is forecast to soften to 4.7% in 2022 as governments gradually withdraw policy support.

Among low-income economies, where vaccination has lagged, growth has been lowered to 2.9%. Setting aside the contraction last year, this would be the slowest expansion in two decades. The group's output level in 2022 is projected to be 4.9% lower than pre-pandemic projections. Fragile and conflict-affected low-income economies have been hardest hit by the pandemic, and per-capita income gains have been set back by at least a decade.

Regionally, recovery is expected to be strongest in East Asia and the Pacific, largely due to the strength of China's recovery. In South Asia, recovery has been hampered by serious renewed outbreaks of the virus in India and Nepal. The Mid East and North Africa and Latin America and the Caribbean are expected to post growth too shallow to offset the 2020 contraction. Sub-Saharan Africa's recovery, while helped by spillovers from the global recovery, is expected to be fragile given the slow pace of vaccination and delays to major investments in infrastructure and the extractives sectors.

The June forecast assumes that advanced economies will achieve widespread vaccination of their populations and effectively contain the pandemic by the year's end. Major emerging-market and developing economies are anticipated to substantially reduce new cases. However, the outlook is subject to considerable uncertainty. A more

persistent pandemic, a wave of corporate bankruptcies, financial stress or even social unrest could derail the recovery. At the same time, more rapid success in stamping out COVID-19 and greater spillovers from advanced-economy growth could generate more vigorous global growth.

Even so, the pandemic is expected to have caused serious setbacks to development gains. Although per-capita-income growth is projected at 4.9% among emerging-market and developing economies this year, it is forecast to be essentially flat in low-income countries. Per-capita income lost in 2020 will not be fully recouped by 2022 in about two-thirds of emerging-market and developing economies, including three-quarters of fragile and conflict-affected low-income countries. By this year end, about 100 million people are expected to have fallen back into extreme poverty. These impacts have been felt the most by the most vulnerable groups – women, children and unskilled & informal workers.

Global inflation, which increased along with the economic recovery, is anticipated to continue to rise over the rest of the year. However, it is expected to hold within the target range for most countries. The World Bank believes that the trend of rising inflation in emerging-market and developing economies may not warrant a monetary-policy response provided it is temporary and inflation expectations stay well-anchored.

A recovery in global trade after the recession last year offers an opportunity for emerging-market and developing economies to bolster economic growth. Trade costs are on average half as much higher in emerging-market and developing economies than in advanced economies, and lowering them could boost trade and stimulate investment and growth. (Source: The World Bank)

Global economic growth is now expected at 5.8% this year, a sharp upward revision from the 4.2% December 2020 Economic Outlook projection for 2021. The vaccine rollout in many advanced economies has been driving the improvement, as has the massive fiscal stimulus by the United States. World GDP growth is expected at 4.4% next year, but global income will still be some \$3 trillion less by end-2022 than was expected before the crisis hit. \$3 trillion is about the size of the entire French economy. Overview of the Indian Economy

After the 2020 huge GDP contraction, economic growth is projected to bounce back in 2021, driven by pent-up demand for consumer and investment goods, before declining in 2022. The dramatic infection upsurge since February has weakened the nascent recovery and may compound financial woes of corporates and banks. As public anxiety over the virus spreads and lockdowns multiply, high-frequency indicators suggest that a marked slowdown may have taken place in the April-June quarter, although the overall annual impact is likely to be muted. Wholesale and retail inflation rates remain elevated, but within the target range of the central bank.

Domestic demand has been on the mend since mid-2020 and near-term prospects were improving until recently. The Purchasing Managers Index points to a recovery of the economy, with recent readings stable at levels above the medium-term average. Merchandise exports and imports surged to record levels in March. Financial markets have attracted considerable foreign portfolio flows, reflecting global trends and sound results, at least for large corporate bodies. Foreign-exchange reserves are close to the all-time record in January, reflecting the central bank's strategy to build a buffer to tide over any possible impact of the unwinding in advanced economies of their anti-pandemic measures.

Even before the new COVID-19 flare-up, some weaknesses were emerging, especially in services where demand is still well below normal. Recent mobility data, including freight-rail traffic, as well as non-mobility indicators such as electricity consumption and e-way bill generation, indicate a weakening recovery momentum. The unemployment rate was volatile in the six months to March 2021, before rising in April, and city lockdowns are spurring waves of return migration to rural areas. Inflation fears are mounting, stoked by prices of vegetables growing fast due to supply-chain disruptions and firming fuel prices.

In 2020, monetary easing, supportive financial regulation and fiscal support were deployed to counter the recessionary effects of the lockdown. Policy fine-tuning is now underway in each area. According to the 2021 Union Budget, the central government deficit is expected to fall to 6.8% of GDP, from 9.5% in FY20-21, with conservative assumptions of nominal GDP growth and revenue. Most of the improvement is cyclical. Following the steep increase in FY20-21, the overall public debt-to-GDP ratio is set to fall slightly to 93% in FY21-22. So far this year, the RBI Monetary Policy Committee has kept the repo rate unchanged at 4%, while signalling its intention of maintaining an accommodative stance as long as necessary. Given the risks to the pace of the recovery,

the central bank is projected to delay any rate increase to mid-2022. The cash-reserve ratio was raised to 4%, while significant sovereign-bond purchases have been announced.

Some structural reforms are envisaged. An asset-reconstruction company and an asset-management company will be set up to take over stressed debt and manage and dispose of impaired assets. The privatisation programme is to be accelerated – including two public-sector banks and one general insurance company – although the difficulties in concluding the long-delayed sale of Air India suggest that the goal of obtaining \$24 billion this year (0.8% of GDP) is ambitious. The reform of agriculture markets, aimed at supporting synergies between farmers and agri-business, has been halted as negotiations between government and farmer organisations remain suspended. The proposal to allow industrial conglomerates to own banks and participate in privatisation, on the other hand, should be considered with great caution.

India is projected to be the fastest-growing G-20 economy in 2021 – but also the one which is the furthest away from its pre-crisis GDP trend. Pent-up demand for consumer durables and exports of manufacturing goods and services will turn out to be favourable, but other components will be far less supportive. Notwithstanding the pressing need to upgrade physical and human infrastructure, as well as greater allocations to capital expenditure and the expansion of the production-linked incentives scheme to sectors other than large-scale electronics manufacturing, weak investment is set to persist. Profit margins in the banking sector are likely to decline, in particular for state banks that may see both impaired loans and credit costs soaring, following the lifting of the moratorium relief to borrowers. Input-cost pressures may push inflation beyond the policy-target band.

In 2020, poverty and informality increased and the ranks of the middle class plummeted, in both cases undoing several years of progress. Other negative consequences of the pandemic have been the surge in the number of school dropouts, heightened child malnutrition due to the suspension of the cooked-meal programme, and of the mid-day school-meal scheme in particular, and more than 150,000 estimated additional child and maternal deaths. Better targeting of energy and fertiliser subsidies, as well as an overhaul of tax expenditures, would free resources for pro-poor fiscal policies. Several states have either recently adopted or are contemplating policies to reserve private-sector jobs for local residents, but absorbing more than 10 million young Indians who join the labour market each year requires first and foremost a pick-up in job-generating investments. Improving the business climate will be crucial. With the share of banking assets that are non-performing expected to shoot up well above 10%, it will be especially important to apply the 2016 bankruptcy code in a consistent, transparent and fast way. (Source: OECD Economic Outlook, May 2021)

The IMF forecasts the Indian economy to grow 12.5% in FY22 and 6.9% in FY23, better than that of China, the only major economy with a positive growth rate last year in the midst of the Covid-19 pandemic. India's GDP contracted 8% in FY21. While China was the only major economy to record growth in 2020 (2.3%), it is expected to lag India in terms of economic expansion; its economy is projected to grow 8.6% in 2021 and 5.6% in 2022.

Industry Overview: Securities Trading

India's market cap-to-GDP ratio witnessed a rise from 54% in 2008 to 76% in 2019, compared to 93% for the overall global equity market (source: World Bank). This shows a scope for further expansion of the India's market cap, driven by both GDP growth as well as an increase in the market cap-to-GDP ratio. With GDP growth expected to gradually pick up, increasing formalisation of economy and more entities from newer segments getting listed (insurance companies, ecommerce service providers), India's market capitalisation to GDP ratio is likely to increase further in next few fiscals. As the covid vaccination drive picks up pace across the globe, the world economy is set to return to the growth path (+5.5% in CY21E) with India expected to lead the growth revival with a double-digit expansion of 11.5% in FY22. Improvement in global macroeconomic factors and monetary/fiscal stimulus by central banks/governments will continue to supply liquidity in global equity markets and support economic recovery over the next couple of years. The IPO market in India has also been buoyant recently with a number of marquee IPOs expected to hit the market this year.

The Indian commodity market went through structural changes in FY19 when the universal exchange principle came into effect with the commencement of commodity trading on the BSE and NSE in October 2018. Commodity market turnover increased by 24.8% from ₹74.3 lakh crore in FY19 to ₹92.6 lakh crore in FY20.

Despite the economy slipping into recession and all activity coming to a standstill for a few months due to the Covid-19 pandemic, markets registered their best financial year performance in a decade. In FY21, the S&P BSE Sensex and Nifty50 have rallied 68% and 71%, respectively.

The rally has been partly on account of strong foreign inflows on expectation of improvement in the economy after a stringent pandemic-triggered lockdown for a few months in FY21. Accommodative monetary policies of global central banks, especially the US, ensured emerging markets, including India, remained flushed with funds all through the year.

A comparison of BSE Sensex with 10 major world indices across nine countries shows that it has been the best performing in the current financial year (till March 29, 2021). On a year-on-year basis, the growth (increase) seen in FY2021 is the highest in the past decade and sixth best since the index's inception (1980).

During the year, foreign portfolio investors (FPIs) pumped in a record \$37 billion (Rs 2.74 trillion) into equities (up to March 26), which is the highest since FY13, data from the National Securities Depository Limited (NSDL) show. On the other hand, domestic mutual funds recorded a net outflow of Rs 1.25 trillion and became net sellers for the first time since FY13.

As a result, from its March 2020 low of 25,639, the S&P BSE Sensex climbed to an all-time high of 52,517 points on February 16, 2021 while the Nifty 50 scaled a record high of 15,432. Rising bond yields and oil prices created some panic, but the long-term outlook for equities still remains strong. Given the abundant liquidity, speedy rollout of Covid-19 vaccines, and consequent signs of economic recovery, Nifty earnings are expected to grow by a high single-digit in FY21.

Another key driver of the market rally has been retail investors, which not only pushed frontline benchmarks to new highs but also triggered an upswing in the mid-and small-cap indices during the year. The gains in mid-and small-caps have, in fact, been sharper with both the indices rallying 91% and 115%, respectively on the BSE.

With monetary easing in the US and other major countries lowering interest rates, Indian equity markets also saw the highest foreign investment in its history (Rs 2,74,108 crore till March 30) during 2020-21. The rise in equity markets as well as lower prevalent saving interest rates in the banks also facilitated larger participation from domestic retail investors as new demat accounts, a good proxy for individuals trading in stock markets, grew by around 115% till January, the highest in the past decade.

Sector sub-indices till March 30 show that firms in sectors such as metals, basic materials and industrials have seen the most growth in share prices in the last year. While every sub sector index has shown a positive growth (on account of lower base), comparison with their five-year growth shows that fewer sectors have actually performed well on a longer-term basis. The metal index gained 144% in FY21, as recovery in global economic activity and China's infrastructure spend kept the demand for industrial metals strong. While Automobile, information technology (IT) also logged stellar gains and doubled, real estate, capital goods, power, Nifty Bank and healthcare indices also outperformed and gained between 70% and 94% in FY21.

Industry Overview: E-commerce

India is the world's eighth largest e-commerce market, \$46 billion in 2020. This included online sales of physical goods to private consumers (B2C) but excluded digitally-distributed services (sale of travel tickets, digital media, B2B e-commerce and online sales between individuals, C2C). India's largest e-commerce operator is Amazon.IN (2020 revenue: \$1.1 billion), followed by BigBasket.com (\$668 million) and Grofers.com (\$492 million).

E-commerce in India can be classified into five broad categories. Electronics & media, the largest, accounts for 32% of e-commerce revenue, followed by fashion with 29%, food & personal care with 23%, toys, hobby and DIY with 11%, and furniture & appliances, 6%.

The share of e-commerce is projected to increase from 4% of retail (food and grocery, apparel and consumer electronics) trade in 2020 to 8% by 2025 in India. E-commerce order volumes increased 36% in the last quarter of 2020. The biggest beneficiaries of this increase were the personal care, beauty and wellness (PCB&W) categories.

The Indian e-commerce market expanded 39% in 2020 compared to 26% for world e-commerce. India has attained an e-commerce penetration of 36%, i.e. 36% of its population bought something online in 2020.

With new markets emerging and further deepening of existing markets, global e-commerce is expected to record robust growth in the next few years with East, Southeast and South Asia seen as leading drivers following an expanding middle class and rising disposable incomes.

India's e-commerce festival sales season (from 15th October to 15th November in 2020) recorded gross sales for brands and sellers of Rs.58,000 crore (\$8.3 billion), up 66% from Rs.35,000 crore (\$5 billion) last year. Similarly, the Indian e-commerce market registered ~88 million users in the festival season CY20, a significant 87% jump over the previous festival season.

The Indian e-retail market is expected to continue its strong growth - it registered more than a 35% CAGR to Rs.1.8 trillion (\$25.75 billion) in FY20. In the next five years, the Indian e-retail segment is projected to exceed ~300-350 million shoppers, propelling the online Gross Merchandise Value (GMV) to \$100-120 billion by 2025.

According to a Bain & Company report, India's social commerce GMV was ~\$2 billion in 2020. By 2025, it is expected to be \$20 billion, with a potentially monumental jump to \$70 billion by 2030, owing to high mobile usage.

Huge investments from global players—such as Facebook, which is investing in Reliance Jio—are being recorded in the e-commerce market. Google also reported its first investment, of \$4.5 billion on Jio Platforms. This deal was followed by the purchase of the Future Group by Reliance Retail, expanding the presence of the Reliance Group in e-commerce arena.

Much of the growth in the industry has been triggered by increasing internet and smartphone penetration. As of September 2020, the number of internet connections in India significantly increased to 776.45 million, driven by the 'Digital India' programme. Of the internet connections, ~61% were in urban areas, of which 97% were wireless.

Smartphone shipments to India touched 150 million units and 5G smartphone shipments crossed 4 million in 2020, driven by high consumer demand during and after the covid-led lockdown. Samsung led the Indian smartphone market with a 24% shipping share, followed by Xiaomi at 23%. Smartphone use in India is expected to rise 84% to 859 million by 2022.

The e-commerce segment has been directly impacting micro, small & medium enterprises (MSME) in India by providing means of financing, technology and training and has a favourable cascading effect on other industries as well. Indian e-commerce has been on an upward growth trajectory and is expected to surpass the US to become the second largest e-commerce market in the world by 2034. Technology-enabled innovations such as digital payments, hyper-local logistics, analytics-driven customer engagement and digital advertisements are likely to support growth in the sector. The growth in e-commerce will also boost employment, increase revenues from export and tax collection by exchequers, and provide better products and services to customers in the long term.

India's e-commerce market is poised to grow 84% to \$111 billion by 2024 following the accelerated adoption of digital technologies amid the Covid-19 pandemic, a report by fintech firm, FIS, said. The report noted that countries, including India, have seen a shift in consumer behaviour caused by Covid-19, and new payment trends are shown to be on the rise. FIS, in its 2021 Global Payments Report, examined current and future payment trends across 41 countries. India's e-commerce market is projected to grow 84% between now and 2024 to about \$111 billion (from about \$60 billion in 2020) driven by mobile shopping, which is projected to grow 21% annually in the next four years, the report said. Digital wallets (40%) followed by credit and debit cards (15% each) were the most popular online payment methods in 2020. Also, digital-wallet purchases are expected to increase its market share of online payments by 2024 to 47%. Besides, 'Buy Now, Pay Later' emerged as the fastest-growing online-payment method in India. While it is only 3% of the market now, it is projected to increase to 9% by 2024 based on the analysis in the report. E-commerce capability is no longer limited to just traditional websites, while physical retail has blended with the digital world. Players positioning themselves with digital-payment capabilities will be well-set to capture the next wave of growth in the retail and e-commerce markets in India.

The report also forecast that the Point of Sale (PoS) market in India would increase by 41% between now and 2024 to \$1,035 billion. The most popular in-store payment method is cash, at 34%, followed by digital wallets (22%) and debit card payments (20%). The report projected that digital wallets will overtake cash as the most popular in-store payment method by 2024, accounting for 33% of payments. The e-commerce market in the Asia-Pacific region is expected to grow 13% per annum until 2024, with the highest growth in developing countries. While China has very high e-commerce penetration and high growth, below-average growth is seen in Thailand, Hong Kong, Taiwan and South Korea. High-growth markets include Indonesia, India, Malaysia and the Philippines with over 14% growth rates, while less-mature, low-growth markets are Japan, New Zealand, Singapore and Australia, per the report.

The Indian e-commerce sector, now growing robustly, is expected to overtake the US to become the world's second-largest e-commerce market in the world by 2034. Indian e-commerce is estimated to strike a 27% CAGR to \$99 billion by 2024 (\$30 billion in 2019) according to the EY-IVCA Trend Book 2021. Key drivers would be the grocery and fashion/apparel sub-segments. The online grocery market is forecast to clock a 57% CAGR (from \$1.9 billion in 2019 to \$18.2 billion in 2024). The report revealed that India will have 220 million online shoppers in India by 2025. Retail penetration is expected to be 10.7% by 2024, contrasted with 4.7% in 2019. It stated that the government is aiming to build a trillion-dollar online economy by 2025, through its Digital India programme. The online retail market in India is estimated at 25% of the formal retail market and is expected to touch 37% by 2020-27. The increase in online users has been seen across various segments coming from tier-2 and -3 cities. This could serve as a great market for native startups to tap into. The report said that the rise of technology adoption among small and medium businesses is also expected to drive growth of native digital startups. With small merchants increasingly implementing online payments and mobile channels, they are also exploring collaborations with technology-driven startups. Simultaneously, various government initiatives (Start-up India, Digital India, Skill India, Innovation Fund, BharatNet) aim to digitise the traditional offline market and boost the e-commerce sector.

According to the EY-IVCA Trend Book 2021, various regulatory reforms such as new draft e-commerce policy, the national retail policy and consumer protection rules 2020 showcase the government's inclination toward building this sector further. It added that the rapid increase in internet users has attracted new budding entrepreneurs to set up establishments coming up with innovative pricing and stocking practices (marketplace vs inventory) while traditional operators (brick-and-mortar stores) are slowly catching up. This has helped in developing B2C e-commerce numerous choices have now been thrown up in terms of brands, faster delivery, discount offers, personalisation, digital payment options, cash on delivery, and easy returns.

The report stated that companies are creating an omni-channel presence, blending online shopping and offline retail to overcome trust issues of customers. Leading e-tailers in India are planning to open brick-and-mortar stores. Digital B2C companies have invested in creation of brands, which attract the young millennial crowd consisting of most online shoppers, who tend to be more brand-conscious. These companies are forming innovative product bundles aligned to the needs of customers and, thus, ensuring greater customer engagement.

The rise of B2C e-commerce

The influx of capital in B2Cs has also been significant, primarily to support supply chains, global expansion, acquisitions and to bring innovative products to the market. The report revealed that the growing B2C e-commerce is attracting much attention and key investments from international companies. In the next phase of e-comm, a surge of demand is expected from tier-2 and -3 cities and towns in India, bringing in the next hundreds of millions of consumers. A new wave of investments in this sector in both B2B and B2C are creating a huge gig economy with several sub-sectors emerging as innovation drives storefronts, local commerce, e-commerce infra and payments.

Some key investments in B2C in 2020: \$90 million in interior-designer marketplace LiveSpace and \$52 million in online grocery platform BigBasket. Key investors include Venturi Partners, Bessemer Venture Partners, Goldman Sachs, TPG Capital, the CDC Group and Alibaba.com India. In 2020, e-commerce and consumer internet companies raised more than \$8 billion in PE/VC across more than 400 deals (excluding the Jio Platform investment) giving rise to nine unicorns. Edtech and hyperlocal segments led the investment, together accounting for over 40% of 2020 investments and clocking 5x and 2x growth in funding value, respectively, over 2019.

Policy environment and government initiatives

The government of India's policies and regulatory frameworks such as 100% Foreign Direct Investment (FDI) in B2B e-commerce and 100% FDI under the automatic route under the marketplace model of B2C e-commerce are expected to further propel growth in the sector. According to the new FDI policy, online entities through foreign investment cannot offer the products which are sold by retailers in which they hold equity stake.

On 15th February 2020, the government e-marketplace (GeM) listed 1,071,747 sellers and service providers for more than 13,899 product and 176 service categories. For the financial year 2020-21, government procurement from micro and small enterprises was worth Rs.23,424 crore (\$3.2 billion).

Through its Digital India campaign, the government of India aims to create a trillion-dollar online economy by 2025. Set up by the Ministry of Commerce, the committee will oversee policy for the Open Network for Digital Commerce (ONDC), an e-commerce platform backed by the government for the development. Inventories are measured at the lower of cost and the realizable value. The cost of inventories is based on the first-in first-out formula, and includes expenditure incurred in acquiring the inventories and other costs incurred directly.

E. Revenue Recognition

According to Ind AS 115, revenue is measured at the amount of consideration the Company expects to receive in exchange for the goods or services when control of the goods or services and the benefits obtainable from them are transferred to the customer. Revenue is recognised using the following five step model specified in Ind AS 115:

Step 1: Identify contracts with customers
Step 2: Identify performance obligations contained in the contracts
Step 3: Determine the transaction price
Step 4: Allocate the transaction price to the performance obligations
Step 5: Recognise revenue when the performance obligation is satisfied

The performance obligations arising from sale of products with the Company's customers are satisfied at a point in time. Sales of products are recognised when control of the products has transferred based on the agreed terms. Revenue is net of sales returns and allowances, discounts and volume rebates if any.

F. Property, Plant and Equipment

Tangible Assets

All items of property, plant and equipment are stated at historical cost less accumulated depreciation & impairment losses, if any. Cost of property, plant and equipments comprises of purchase price, non-refundable taxes and duties and any directly attributable cost of bringing each asset to its working condition for the intended use. Financing costs relating to borrowed funds attributable to the acquisition of qualifying property, plant and equipments i.e. asset that necessarily takes a substantial period of time to get ready for its intended use or sale, upto the completion of construction or acquisition of such property, plant and equipments are included in the gross book value of the asset.

- Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that incremental future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.
- Gains or losses arising on retirement or disposal of property, plant and equipment are recognised in the Statement of Profit and Loss.

Annexure V - Basis of Preparation and Significant Accounting Policies

Notes on Restated Financial Statements for the period ended 30th June, 2021

Depreciation

Depreciation is calculated on cost of items of property, plant and equipment less their estimated residual values over their estimated useful lives using the written down value method, and is generally recognised in the statement of profit and loss. The estimated useful lives of items of property, plant and equipment prescribed as per Schedule II are as follows:

	Method of	Useful
life Depreciation		
Computers and data processing unit	Written Down value	3 years
Office Equipments	Written Down value	5 years
Furniture and Fittings	Written Down value	10 years
Plant & Machinery	Written Down value	15 years

Depreciation method, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.

Depreciation on additions (disposals) is provided on a pro-rata basis i.e. from (upto) the date on which asset is ready for use (disposed of).

G. Income Tax Expense

Income tax comprises current and deferred tax.

Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax reflects the best estimate of the tax amount expected to be paid or received after considering the uncertainty, if any, related to income taxes. It is measured using tax rates (and tax laws) enacted or substantively enacted by the reporting date.

Current tax assets and current tax liabilities are offset only if there is a legally enforceable right to set off the recognised amounts, and it is intended to realise the asset and settle the liability on a net basis or simultaneously.

Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the corresponding amounts used for taxation purposes. Deferred tax is also recognised in respect of carried forward tax losses and tax credits. Deferred tax is not recognised for:

- temporary differences arising on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss at the time of the transaction;
- temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Company is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and
- taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which they can be used. The existence of unused tax losses is strong evidence that future taxable profit may not be available. Therefore, in case of a history of recent losses, the Company recognises a deferred tax asset only to the extent that it has sufficient taxable temporary differences or there is convincing other evidence that sufficient taxable profit will be available against which such deferred tax asset can be realised. Deferred tax assets — unrecognised or recognised, are reviewed at each reporting date and are recognised/ reduced to the extent that it is probable/ no longer probable respectively that the related tax benefit will be realised.

Deferred tax is measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on the laws that have been enacted or substantively enacted by the reporting date.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“**FDI**”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the “Department of Industrial Policy and Promotion”) (“**DPIIT**”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2020 (“**FDI Circular 2020**”), which, with effect from October 15, 2020, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2020 will be valid until the DPIIT issues an updated circular.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict, the relevant notification under Foreign Exchange Management (Non-Debt Instruments) Rules, 2019 will prevail. The payment of inward remittance and reporting requirements are stipulated under the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 issued by RBI. The FDI Circular 2020, issued by the DPIIT, consolidates the policy framework in place as on October 15, 2020, and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectorial limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

No investment under the FDI route (i.e any investment which would result in the investor holding 10% or more of the fully diluted paid-up equity share capital of the Company or any FDI investment for which an approval from the government was taken in the past) will be allowed in the Issue unless such application is accompanied with necessary approval or covered under a pre-existing approval from the government. It will be the sole responsibility of the investors to ensure that the necessary approval or the pre-existing approval from the government is valid in order to make any investment in the Issue. The Lead Managers and our Company will not be responsible for any allotments made by relying on such approvals.

Please also note that pursuant to Circular no. 14 dated September 16, 2003 issued by RBI, Overseas Corporate Bodies (“**OCBs**”) have been derecognized as an eligible class of investors and RBI has subsequently issued the Foreign Exchange Management (Withdrawal of General Permission to Overseas Corporate Bodies (OCBs)) Regulations, 2003.
